CHEST X-RAY AND CORONARY ARTERIOGRAPHY

Name_____

Date of angiography____/____/____ DATE08
Mo. Day Yr.

A. Chest X-Ray

1. Heart

HTNORM08 Normal ☐ LV contour abnormal ☐ ABNCON08
ENLRGD08 Enlarged ☐ Other abnormality ☐ HRTOAB08
GRADTN08 1 slight ☐
2 moderate ☐
3 marked ☐

2. Cardiothoracic ratio CRATIO08
Unable to determine ☐ UNABLE08

3. Lungs and pleura

LNGNRM08 Normal ☐ Increased upper lobe venous markings (P.V.C.) ☐ VENMK08
LNGOAB08 Other abnormality ☐

B. Arteriography

1. Was study completed 1 Yes ☐ 2 No ☐ COMPLT08
If no, explain (20-keystroke limit) _____

2. Technique
IV—Heparin: 1 Yes ☐ 2 No ☐ IVHEP08
1 Cutdown ☐ 2 Percutaneous ☐ 3 Both ☐ TECHNQ08
1 Brachial ☐ 2 Femoral ☐ 3 Both ☐ 4 Other ☐ ARTERY08

3. Complications 1 Yes ☐ 2 No ☐ CMPLIC08
If yes, complete "Complications" form.

4. Congenital and other abnormalities 1 Yes ☐ 2 No ☐ CONGEN08
If yes, explain (17-keystroke limit) _____

For clinic use:_____

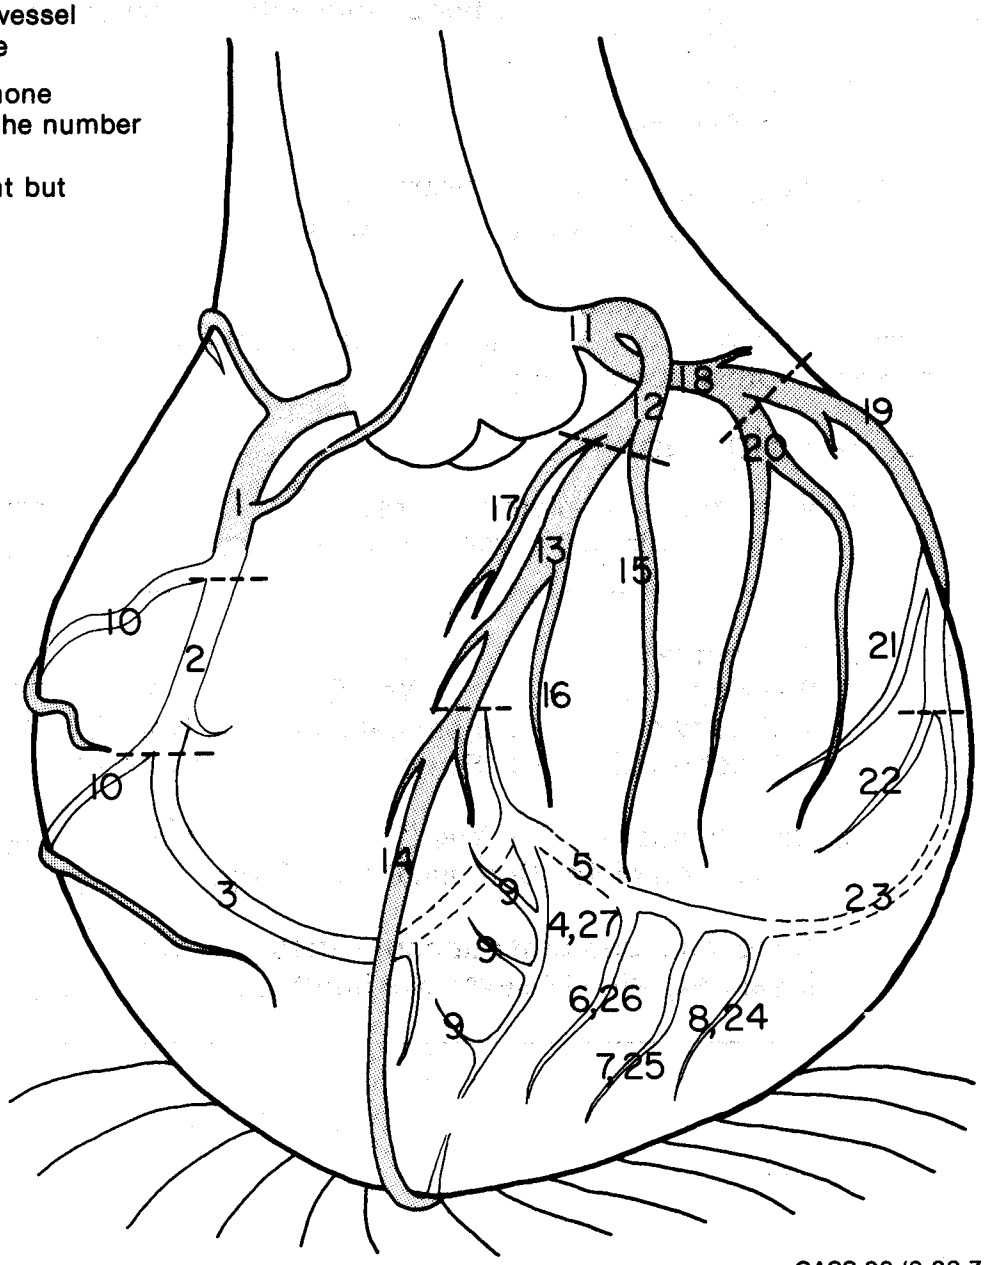
☆ GPO 796-224

Diam. % Obstr: Indicate normal by 0 or blank. If segment is not visible, leave % obstruction blank and fill in morphology (7 = not visible).

Morphology of Lesion:
0 = normal
1 = single discrete lesion
2 = multiple discrete lesions
3 = diffuse disease with or without additional discrete lesions
4 = discrete aneurysmal
5 = diffuse aneurysmal
6 = tubular
7 = not visible

Morphology of Distal Vessel:
0 = normal size, not diseased
1 = normal size, diseased
2 = small size, not diseased
3 = small size, diseased
4 = poorly visualized
5 = absent due to unquestioned anatomic variation
6 = no distal vessel
7 = not visible

Collateral: 0 or blank = none
If collateral is present, give the number of the sending segment.
50 = collateralization present but sender undetermined.



CHEST X-RAY & CORONARY ARTERIOGRAPHY Name _____

ENTNRM08
Entirely normal ☐

	Location	Diam. % Obstr.	Morph. of Lesion	Morph. of Dist. Vessel	Collateral(s)
