My Peak Flow

Talk to Your Doctor About:

- Your asthma treatment goals and how to achieve them
- Your medications—what they are for, how much to take, and when and how to take them
- How to use your inhaler and a peak flow meter, if you have one
- Your asthma triggers and how to avoid them
- Warning signs of an asthma attack and what you should do if your symptoms get worse

Ask for a written asthma action plan for responding to worsening symptoms—and make sure you understand it.

My Best Peak Flow

Green Zone
(80–100 percent of best peak flow)

Yellow Zone
(50–79 percent of best peak flow)

Red Zone
(Less than 50 percent of best peak flow)
