

Read the Nutrition Facts Label To Choose Foods Lower in Saturated Fat, *Trans* Fat, and Cholesterol

Nutrition Facts labels tell you what you need to know to choose foods that are lower in saturated fat, *trans* fat, and cholesterol. Here is a Nutrition Facts label for a carton of whole milk.

The label tells you:

Amount Per Serving

The nutrient amounts are for one serving. So, if you have more or less than one serving, you need to add the corresponding nutrient amounts. For example, if you drink 2 cups of whole milk, you are drinking two servings. You would need to double the amount of calories, saturated fat, *trans* fat, and cholesterol.

Nutrients

Here are the amounts of saturated fat, *trans* fat, and cholesterol in one serving. These amounts are given in grams (g) or milligrams (mg).

Percent Daily Value

The Percent Daily Value helps you compare products. Choose products with the lowest Percent Daily Value for saturated fat and cholesterol. If you have high blood cholesterol, you should eat even less saturated fat, *trans* fat, and cholesterol. A doctor or registered dietitian can help you with this.

The Choice Is Yours—Compare!

Which one would you choose?

Except for calories and saturated fat, fat-free milk has all the nutrients of whole milk, including the calcium. That makes fat-free milk a better choice! Read Nutrition Facts labels, and choose products to keep your heart strong.

Whole Milk

One cup of whole milk has 25 percent of the Daily Value of saturated fat. This is one-fourth of the total amount of saturated fat that you should have in 1 day. This is too much!

Fat-Free Milk

One cup of fat-free milk has no saturated fat. You can learn a lot from a Nutrition Facts label.

*Percent Daily Values are based on a 2,000-calorie diet. Your Daily Values may be higher or lower depending on your calorie needs.
